

Business- and digital card cutter CC 150

The easy and professional way of cutting business cards, tickets and more

Business- and digital card cutter CC 150

Professional business cards, tickets and more

The solution for digital printers: With the new HEFTER Systemform card cutter CC 150 is the production of various jobs, such as business cards, tickets, photos or post cards, done in no time.

Produce accurately trimmed sizes by cutting, creasing or perforating – with the CC 150 it's easy and works excellent.

Easy, individual and fast

Use predefined programs for producing standard trimmed sizes. Also individual jobs can be programmed and stored anytime.

Just enter the printed A4 sheets, select the program and start. A4 sheets of different thickness (up to 350 g/m²) and even oversized forms like SRA4 will be fed reliably.

Either the sheet edge or an optical mark can be selected as start position for the cuts and intermediate cuts. Optical marks printed on sheets ensure an automatic image drift compensation.

The cutted cards are stacked in an adjustable tray and are easily accessible for the operator. The cutting and slitting knives are extremely strong, and ensure an always professional look of the cards, even after a high quantity of cuts.

Easy operation and individual adjustment of the paper thickness

Infinitely variable, magnetic, stacker

The blade magazine can easily be removed and changed, e.g. for perforating or creasing blades

Important technical data CC 150

Paper size feeding	Width 150 - 225 mm, length 80 - 999 mm
Paper weight	100 - 350g/m ²
Trimmed size, width	Width 85 or 90 mm – length infinitely variable (25 - 999)
Margin	The cards are cut on all 4 sides
Feeding capacity	25 mm
Stacker	Infinitely variable up to C5
Speed / minimum	Up to 10 sheets respectively 100 business cards
Dimension of the machine (LxWxH)	410 mm x 350 mm x 280 mm
Weight of the machine	Appr. 24 kg
Counter	Job counter and pre-counter
Options	Replaceable blades, perforating and creasing units

(subject to technical changes)

Overview of the CC 150 advantages

- Can process digital templates smoothly
- Easy: 8 standard programs are pre-installed
- Individual: individual programs are stored
- Optional: perforating or creasing blades
- Versatile – also suitable for tickets, post cards and fotos
- Image drift compensation with optical marks
